

ADA COMPLIANT RESTROOM THAT CONVERTS TO A SIX-MAN URINAL

Standing Room Only - turn your Freedom 2[®] into a six-man urinal in minutes.

Fully Compliant ADA Restroom

The Americans with Disabilities Act (ADA) requires 5% of all portable restrooms, and at least one unit per cluster, to be ADA compliant (except construction sites). The Freedom 2[®] portable restroom from Satellite offers 100% compliance with economy and style – plus, something more! In just minutes, Freedom 2[®] can be easily converted to the Standing Room Only six-man urinal. Depending on your customers' varying needs, you can quickly switch the unit from one to the other and serve two profitable niches. This flexibility gives you new opportunities for expanded use and a far greater return on your investment.

Durable, Lightweight Construction

The Freedom 2[®] and Standing Room Only cabana is built with rugged polyethylene for years of durable use. A one-piece seamless roof gives the unit added strength and stability.

Easy Handling and Transport

Freedom 2[®] features a patented, flat ground-level entry, eliminating the need for a ramp. That means easier set-up and no loose parts to hassle with. Hand grips on each side and built-in corner grips make moving easy. Built-in roof channels allow for easy tie-down. And the size and shape of Freedom 2[®] enables you to transport multiple units on a single vehicle or trailer.
